

KOTRACK

YOUR RELIABLE SEALING SOLUTION PARTNER

RELIABLE

PROFESSIONAL

MODERATE

Our Mission

Our company is leading seal maker specially for Hydraulic and Pneumatic seal product.

Our product range is

- * Whole hydraulic seal for construction machinery and industrial used.
- * Repair seal kit(for Doosan, Hyundai, Volvo, Komatsu, Hitach, Kobelco, Cat...etc)
- * Hydraulic Breaker seal
- * Hydraulic Breaker seal kit
- * Floating seal
- * Machined seal(made by CNC for Special size by Special material) etc.

KTR Sealing solution characterized by to provide Heat resistance/Cold resistance /Reducing oil pollution. This is main stream of needs of Cylinder maker and we are providing verified OEM quality seal. Recently KTR seals made a remarkable growth of quality and quality control, the quality already have reached or surpassed the Global Major leading seal maker quality with very reasonable cost.

Our motto is to provide to our costumer Most reliable, Most superior, Most reasonable sealing solution to satisfy customer requirement.

PISTON SEAL – STYLE : GRBW(D-SEAL/GR)

Material & working condition	Main function	Feature
PTFE PISTON SEAL 70A NITRILE ENERGIZER Working Temperature : -30~100℃ Working Pressure : 35Mpa Speed : 0.05~1.5 m/s.	Retention of oil pressure	A PTFE seal ring ① with excellent friction and abrasion characteristics is used. It has the oil pressure introduction slit②, the oil pressure enter the installation groove(pressure side) beginning at the early stage of pressure application, smoothing movement of the packing to the side opposite the pressure side..

1. Hydraulic seal

PISTON SEAL – STYLE : **OK**

Material & working condition	Main function	Feature
NYLON SEAL WITH NITRILE ENERGIZER Working Temperature : - 30~110℃ Working Pressure : 0~50 Mpa Speed : 0.005~1 m/s.	Retention of oil pressure	The OK type double action piston seal is designed for heavy duty hydraulic applications. The small profile is resistant to shock loads and has high abrasion and extrusion resistance. Its split design allows simple installation on a solid piston..

1. Hydraulic seal

WEAR RING- STYLE : WRW/GWR/AWR (WR)

Material & working condition	Main function	Feature
①WRW: HRM 100, C/Strength 250Mpa (Temperature range: -40~120) ②GWR : HRM 105, C/Strength 280Mpa (Temperature range: -40~130) ③AWR : HRM 115, C/Strength 344Mpa (Temperature range: -40~200)	Bearing	Stick slip is prevented by using PTFE's excellent friction characteristics. Fabric phenol resin with high elasticity is used for applications requiring large lateral load. GWR : filled graphite compound for improving lubricant AWR : it is made of Aramid fabric which has very special compressive strength(344Mpa) and cold proof and high heat resistance. ※ When the O/D is over 100 Φ, Thickness is under 2.5 mm , Height is under 15 mm, we suggest to use AWR or at least use GWR to assure the compressive strength.

1. Hydraulic seal

DUST RING- STYLE : DZW(DR,DZT)/KZW(KZT)

Material & working condition	Main function	Feature
①DZW : Teflon(Glass filled) ②KZW : Teflon(Moly filled) Working Temperature : - 55~220℃ Working Pressure : - Mpa Speed : 0.005~1.5 m/s.	Elimination of foreign objects in oil	Intrusion of foreign objects into the piston packing is inhibited by burying and capturing the foreign objects not only by scraping off foreign objects in the oil but also using PTFE's plastic deformability.

BUFFER SEAL – STYLE : HBW/HBHW(HBY)

Material	Main function	Feature
①TPU : HS A 94 - Pressure: 0~45Mpa - Temperature range: -30~100 ②TPU : HS A 93 - Pressure: 0~50Mpa - Temperature range: -40~130 ③PA : Polyamide HS D 80	Buffering of impact pressure applied to rod packing	Since there are high pressure, TPU sealing ①② is used in combination with PA backup ring ③ , to use TPU with a combination of strength and flexibility so that the pressure resistance is supplemented. For your reference, since most sealing rod cover sealing performed by buffer seal. So the selection of proper buffer seal is very important than rod seal.

1. Hydraulic seal

BUFFER SEAL – STYLE : HBYW(HBTY)

Material & working condition	Main function	Feature
Bronze filled Teflon Rubber energizer Working Temperature : -30~100℃ Working Pressure : 0~35 Mpa Speed : 0.005~1.5 m/s.	Buffering of impact pressure applied to rod packing	Teflon is used for sliding material . This packing has low friction resistance eliminating stick slip and assuring high wear resistance.

1. Hydraulic seal

ROD SEAL – STYLE : IDKW/ISW(ISI)/IDW(IDI)/UPRH/IUW(IUH)/IUW2(IUH new type)

Material & working condition	Main function	Feature
① PU: Heat resistance application (-35~130℃) ② PU: General temperature used (-30~100℃) ③ Nitrile rubber (-25~100℃) ④ Nitrile rubber for energizer. * Speed : ①/② : 0.03~1.0 m/s ③ : 0.008~1.0 m/s	Prevention of external oil leakage	IDKW : it's excellent use for high heat working condition. IDW/ISW : It has excellent wear resistance and sealing ability and can be apply very wide range. IUW : Improvement is made to prevent damages by back pressure. IUW2 : more improved to prevent the damage through outer sealing lip also. Also has low temperature resistance. UPRH/UPRM : Is good for use for old machine for more wide sealing lip size and rubber energizer.

ROD&PISTON SEAL – STYLE : UPNW(UPH/USH)

Material & working condition	Main function	Feature
Nitrile rubber Working temperature : -25~100 °C Speed : 0.008~1.0 m/s Working pressure : 0~15Mpa(w/o B.U.R), 0~32(w/ B.U.R)	Prevention of external oil leakage or Retention of oil pressure	This can be used for piston and rod seal. Nitrile rubber and fluoro rubber are available for material to assure wide range of operating temperature. Wide variation of size is available.

PACKING BACK UP RING – STYLE : BRDW(BRN)

Material & working condition	Main function	Feature
Special nylon material Working temperature : -55~120℃ Speed : - m/s Working pressure : - Mpa	Prevent packing extrusion	Material : Polyamide + Special Material Shock proof material inside. Low friction Material inside. ; It can be replaced also instead PTFE B/U ring to prevent the oil pollution and cost down.

PACKING BACK UP RING – STYLE : BRBW/BRWW/BRGW (BRT)

Material & working condition	Main function	Feature
Teflon (B:Bronze,W:white,G:glass) filled. Working temperature : -55~120 °C Speed : - m/s Working pressure : - Mpa	Prevent packing extrusion	This is used to prevent extrusion packing and to improve the pressure resistance of the packing. Standard cutting type is Endless type. But once need bias cut type can be supply by Bias cut type.

DUST SEAL(Steel cover) – STYLE : DKBW(DKBI)

Material & working condition	Main function	Feature
① TPU : - Pressure: - Mpa - Temperature range: -55~100 ② SPCC	Prevent of intrusion of foreign objects	To cope with the harsh external contaminant conditions, high strength TPU is used to resist plastic deformation. Since the SPCC phosphate process, the bonding with TPU is very strong. Since the ideal design of the dust sealing lip, it can be done ideal dust wiping for good dust resistance and good oil film making.

PIN DUST SEAL – STYLE : VAW(PPY,DKIY,VAY)

Material & working condition	Main function	Feature
①TPU : - Pressure: - Mpa - Temperature range: -35~100 ②SPCC	This is a dust seal for oscillating and rotating movement for hinge pin and bush.	This can be used under severe dust conditions to improve the durability of the equipment . Relief effect makes easy to drain used grease when filling up new grease. The metallic protection plate reduce the lip wear and prevent the seal lip from harsh impact like stone from out side.

1. Hydraulic seal

CUSHION SEAL – STYLE : N4BN(N4B NEW TYPE)

Material & working condition	Main function	Feature
Nylon glass filled Black color Working temperature : -20~110 °C	Cushion at the end of the stroke in a hydraulic cylinder.	This is a standard type of cushion seal. Seal inside has damper.

SEAL INFORMATION

1. Hydraulic seal

CENTER JOINT SEAL – STYLE : ROI/CSI

ROI

CSI

Material & working condition	Main function	Feature
Polyurethane Working temperature : -20~100℃ Working pressure : 0~35Mpa	Retention of oil pressure	This is a special seal for center swivel with excellent wear resistance and extrusion proof ability. Since the perfect sealing cannot be expected, please provide a drain at end and use oil seal for rotating pressure with it.

2. Hydraulic seal repair kit

KTR providing special concept of high quality service kit.

We are the exclusive authorized genuine seal kit supplier for **Doosan infracore** and **Hyundai heavy industries** whom the biggest construction machinery in Korea

We are supplying **new concept hydraulic seal kit** with them named **'Superior seal'** hydraulic seal repair kit' .

'Superior seal' hydraulic seal repair kit is the seal kit for the repair but the seal configuration of seal kit is replaced by more **superior** and **evolved seals** instead the **initial seal configuration of maker** for more **superior sealing performance**.

All consisted seals are already verified and proved the sealing performance by KTR bench testing and OEM field testing.

'Superior seal' hydraulic seal repair kit aim to improve **'Heat resistance'** , **'cold proof'** , **'Reducing oil pollution'** to achieve **extension of cylinder life**.

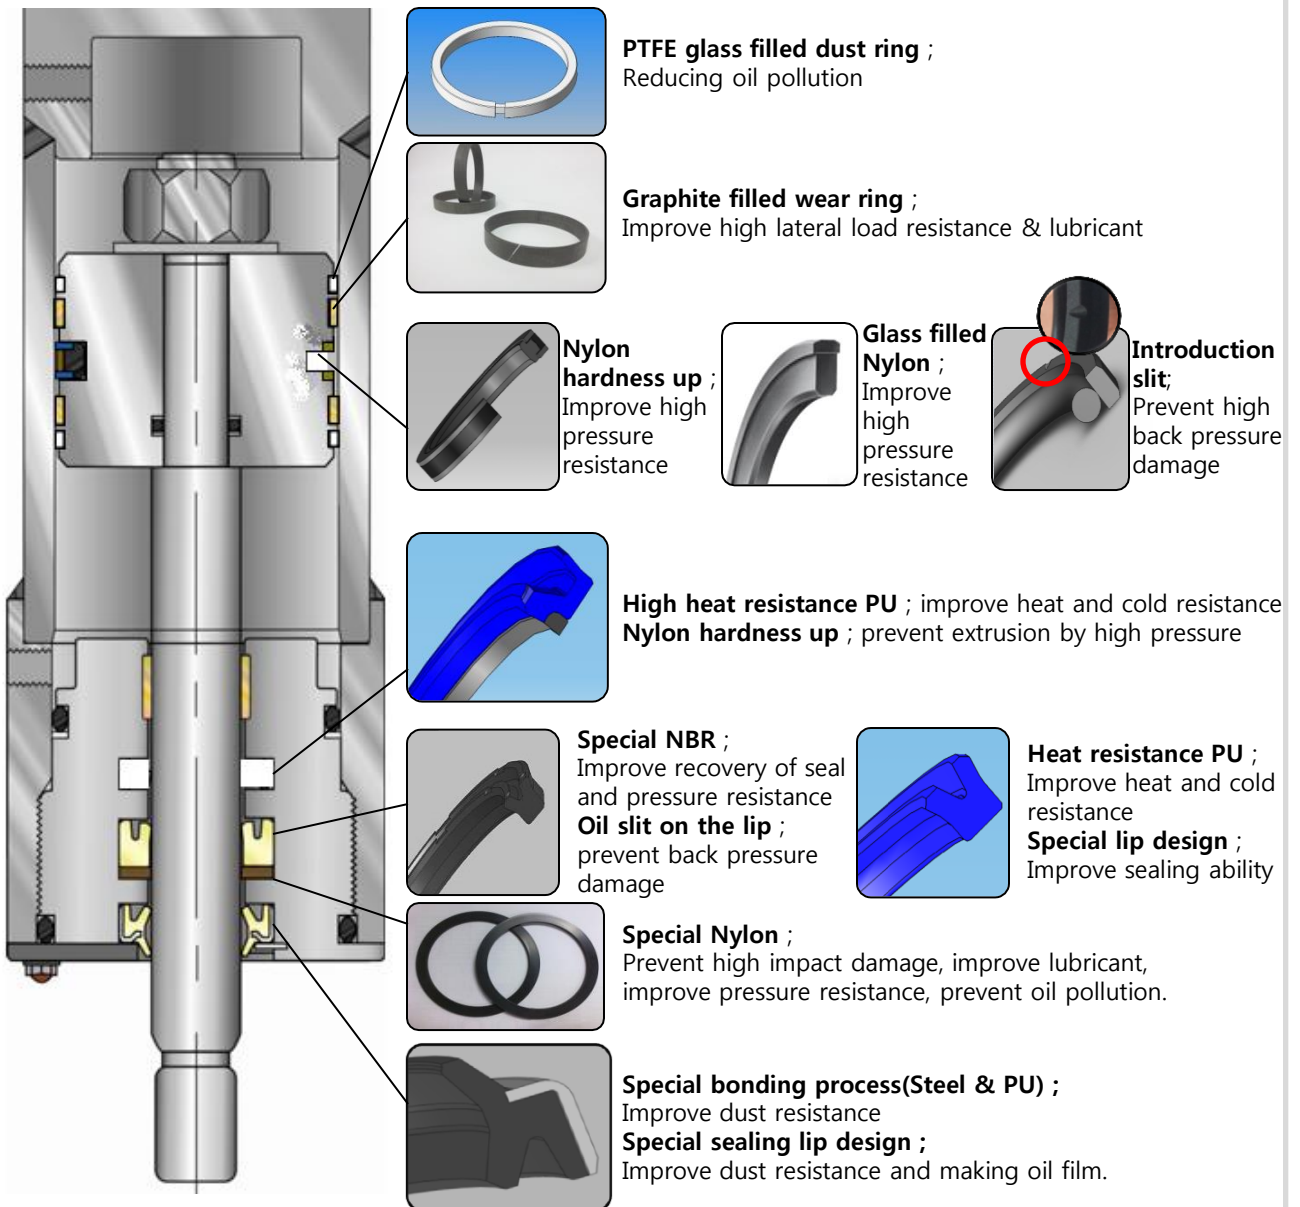

And this is the main stream of all top class cylinder maker aiming.

3. Hydraulic Breaker seal

KTR providing special concept of high quality Hydraulic Breaker seals.

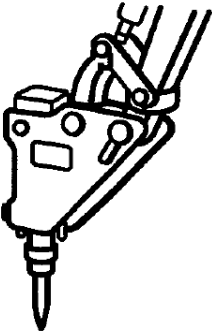

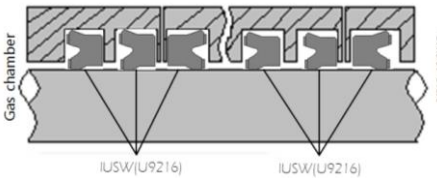

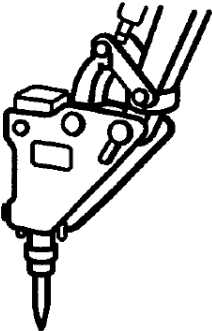

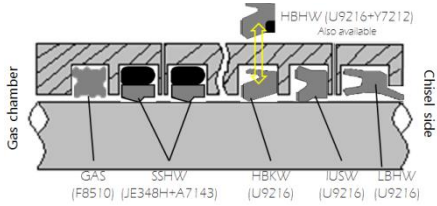

The quality already verified by supplying OEM manufacturer like

The Korea biggest Breaker manufacture **Everdigm** etc.

The Special polyurethane material is developed by KTR

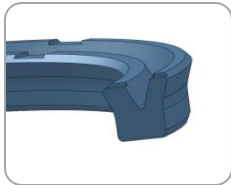

And produced by KTR also.

3. Hydraulic Breaker seal

Equipment	Operating condition	Magnified view of sealing system	Feature
 <p>Hydraulic breaker</p>	<p>0~16.7 Mpa {0~170kgf /cm²}</p> <p>-</p> <p>30~100 °C</p>	 <p>Gas chamber</p> <p>Chisel side</p> <p>IUSW(U9216) IUSW(U9216)</p>	<p>All seal using IUSW type only, because of high speed and high pressure. U9216 poly urethane material is used for severe operating condition.</p>
 <p>Hydraulic breaker</p>	<p>0~17.7 Mpa {0~180kgf /cm²}</p> <p>-</p> <p>30~100 °C</p>	 <p>Gas chamber</p> <p>Chisel side</p> <p>GAS (F8510) SSHW (JE348H+A7143) HBKW (U9216) IUSW (U9216) LBHW (U9216)</p> <p>HBHW (U9216+Y7212) Also available</p>	<p>'HBKW' is used upper hydraulic seals to reduce the friction. 'SSHW' is also used to absorb impact pressure and reduce the friction. 'GAS' with high wear resistance characteristics is used for gas seals to prevent oil scapping off from the gas chamber.</p>

3. Hydraulic Breaker seal

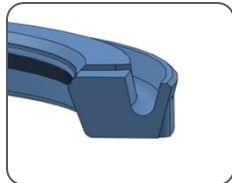

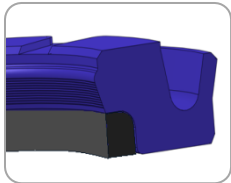

ROD SEAL

Style : **IUSW(IUSI)**
Material : High performance PU

Page:
211

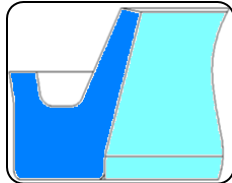

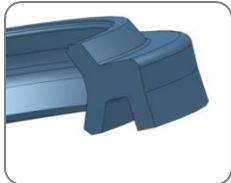

BUFFER SEAL

Style :
HBHW(HBY)/HBKW
Material : High performance
PU+P/A / High performance PU

Page:
213-
14

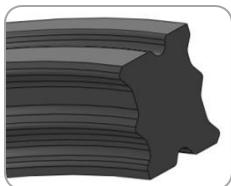

DUST SEAL

Style : **LBHW(LBI)/LPIY**
Material : High
performance PU

Page:
215-
216

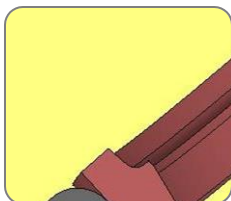

GAS SEAL

Style : **GAS**
Material : FKM

Page:
217

STEP SEAL

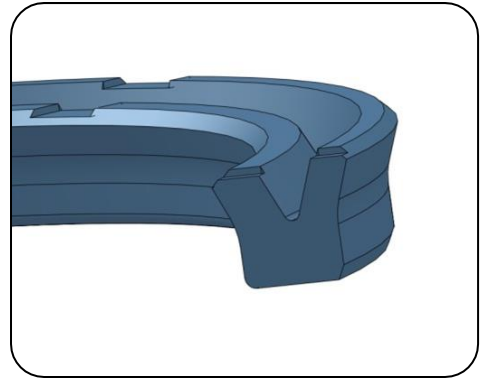

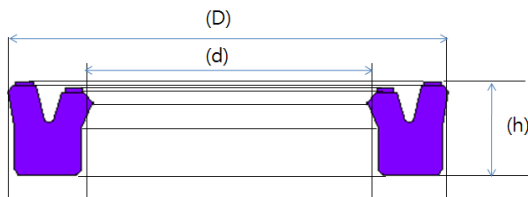

Style : **SSW(E-RING,SK)**
Material : PTFE+NBR

Page:
218

3. Hydraulic Breaker seal

ROD SEAL- STYLE : IUSW

Material	Main function	Feature
Heat resistance PU - Pressure: 0~50Mpa - Temperature range: -35~130	Prevention of external oil leakage	Since the heat resistance PU material has very special heat resistance for low temperature and high temperature, it can be used at very wide temperature range. And since it has very good elasticity even under hard working condition, good for prolong the seal life time (Compression set : 25% in 80 °C 70hr)

3. Hydraulic Breaker seal

ROD SEAL- STYLE : HBHW

Material	Main function	Feature
① Heat resistance PU - Pressure: 0~50Mpa - Temperature range: -35~130 ② Nylon back up ring	Buffering of impact pressure applied to rod packing	Since there are high pressure & impact , TPU sealing ① is used in combination with P/A backup ring ②, to use TPU with a combination of strength and flexibility so that the pressure resistance is supplemented. Some case, the P/A back up ring can scratch the rod, without back up ring style "HBKW" also available to use.

3. Hydraulic Breaker seal

DUST SEAL- STYLE : LBHW

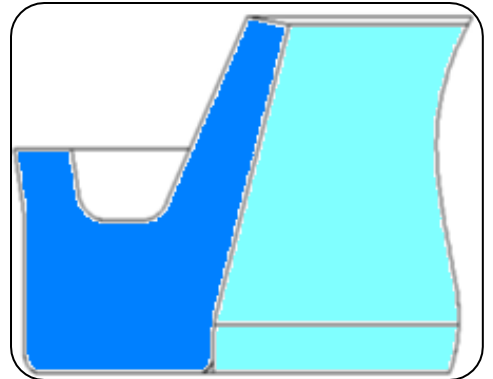

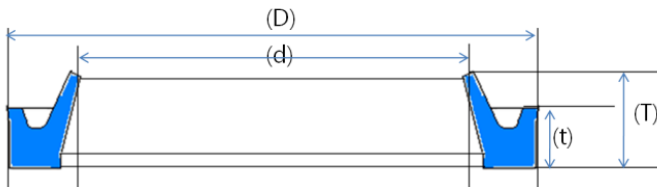

Material	Main function	Feature
Heat resistance PU - Pressure: 0~50Mpa - Temperature range: -35~130	Prevent of intrusion of foreign objects	To cope with the harsh external contaminant conditions, high strength TPU is used to resist plastic deformation. Since the ideal design of the dust sealing lip, it can be done ideal dust wiping for good dust resistance and good oil film making.

4. Hydraulic Breaker seal kit

KTR providing special concept of high quality seal.

We are supplying **new concept hydraulic breaker seal kit** with them named '**Evolution seal kit**'.
What we call Evolution seal kit? It's the seal kit for the repair but the seal configuration of seal kit is replaced by more **superior** and **evolved seals** instead the **initial seal configuration of maker** for more **superior sealing performance**.

All consisted seals are already verified and proved the sealing performance by OEM bench testing and field testing.

Evolution seal kit aim to improve '**Heat resistance**', '**cold proof**', '**Reducing oil pollution**' to achieve **extension of cylinder life**.

And this is the main stream of all top class cylinder maker aiming.

7. Custom oil seal

KTR available providing any type of oil seal as customer request by our design and material and molding

This oil seal can be used for Car and Heavy equipment and other industrial using
Kindly check below profile of available oil seal and if you need any type of oil seal, please contact
with us

Also if you can not find the type which you looking for, please try to contact with us
we can discuss about new development also

8. Machined seal

KTR available to provides a wide selection of custom, cost effective sealing solutions using advanced rapid-prototype technology.

The programmable CNC production cell can manufacture both hydraulic and pneumatic styles of o-rings, rod seals, piston seals, wipers, backup rings, rotary seals, swivel seals and static seals in both imperial and metric sizes for almost any fluid power application including agriculture, automotive, heavy construction, material handling, manufacturing, mining, logging, fluid handling and refuse.

KTR technology gives you the ability to source custom manufactured products with a short turn-around time and with no mold costs. KTR software offers over 100 standard profiles and can produce countless custom designs by modifying the standard dimensions. The advanced lathe technology results in exceptional sealing products with smooth corners and fillets, fine surface finishes and sharp lips. KTR cooperate with leading Korea factory who has a large inventory of high quality materials in numerous sizes including materials from elastomers of rubber and urethane to plastics of fluoro-polymers (PTFE) and Acetal (POM) available for your sealing application.
