PRODUCTION WORKSHOP

We are following excellent quality and depending on industrial production management strategies of fine manufacturing workshop. Our company constantly upgrades workshop manufacturing platform and improves quality production line by the employment of technical personnel and the application of digital advanced manufacturing equipments and professional testing system. Besides, we hold a strong creative ability and be able to meet the diverse requirements of customers based on the principles of high efficiency, high accuracy, high quality.

▲ Welding robot

▲ The piston rod processing machine

▲ Cylinder head finishing machine

▲ Japan Mazak machining center

▲ Japan Mazak CNC lathe

▲ Cylinder finishing machine

▲ Cylinder inner bore skiving and roll finishing machine

PRODUCTION WORKSHOP

▲ Cylinder inner bore skiving and roll finishing machine

▲ Group head cutting of skiving and roll finishing

▲ Electroplating hard chrome

▲ Forging machine set

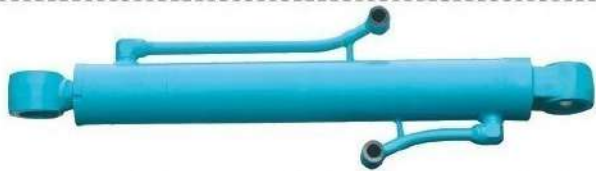

▲ Quality inspection

▲ The corner of workshop
